

Environmental Issues Committee
DHMH
August 22, 2002

Minutes

In reviewing the DRAFT Priorities & Recommendations the group felt that the compilation of statements provided by members, disseminated in mid-August, was a more useful set of priorities/issues than was the more recent distillation.

It was clarified that there is no specific limit to the number of Priorities or Recommendations that each group can make.

The following chapter format was selected:

- Introduction
- Issue (to be prioritized later)
- Problem Statement (describe why recommendations are necessary)
- Recommendations (short-term & long-term)
- Conclusion

The document was revised and will be reviewed by the group for intent, language, etc., before circulation to the rest of the committee for their input into developing problem statements and further refinements.

The group will complete its remaining work via electronic means.
